

UI Reflection - Omnivox App

Group Members - Sk Tanveer Ali, Fransiskus Aldo, Shima Deljavan Farshi, Andy Vo & Zakaria Multani

Visual Design :

The first look of the app is simple and shows a lot of information at once out of which some parts can be highlighted for better attention.

For example- Notification for the next class could be highlighted.

- Hierarchy - Page starts with a hero banner followed by most important informations to check.
- Color Scheme - Variety of colors with good contrast used.
- Typography - Sharp and clear fonts.
- Imagery/Graphics - High quality images used related to topics. Simple professional graphics.

Usability:

- Navigation - Intuitive, easy to understand, very well differentiated, meaningful signifiers button labeling can be improved.
- Accessibility: Heptic response can be setup.
- Responsiveness - App is fast.

Interaction Design:

- Load time - Quick
- Error Handling - Offline Notification

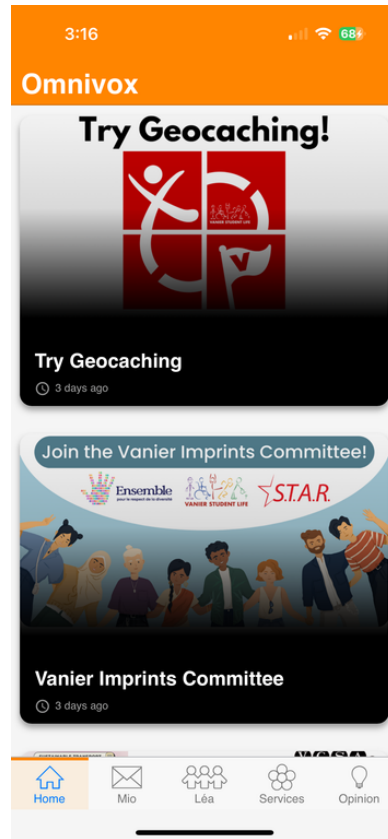

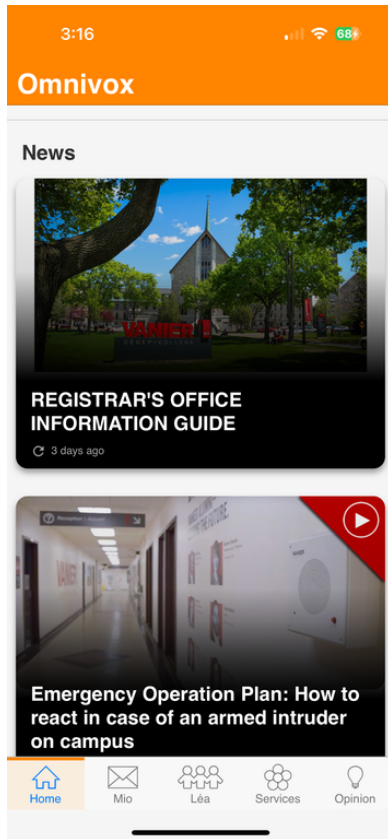

Content:

- Readability - Comfortable to read but some button labels are not understandable.
- Consistency - Color scheme and design is consistent on all pages. Same font style and sizing used. Highlighting can be improved.

Innovation:

- Engagement - Very engaging sections. Use of sliders to fit more information in one place.
- Creativity - Colourful and graphical representation. Creative icons used and good categorization.

Relevant imagery and graphics used

Colour scheme and design is consistent in all pages as shown above and below
